

PARENTS DESERVE A BRAKE!

Introducing the world's first
instructor brake for the family auto.

TEENSAFE™ Passenger Brake is the world's first driver training brake designed for use by parents during the critical period when a child is LEARNING TO DRIVE.

Professional driving instructors never leave the lot without one. And neither should you. A safe learning environment not only reduces the risk and anxiety associated with training your teen, but contributes to a calm, focused atmosphere for effective "real world" skill development.

TRAIN SAFELY BEHIND THE WHEEL. The experience teens gain through behind-the-wheel training by the parent is **invaluable**. Please do it safely. And get the peace of mind you deserve with TEENSAFE™.
